

SERVICES & CAPABILITIES

Building the future, together.

Your end-to-end technology partner — product engineering, quality, integration, Salesforce, AI and connected devices. Engineered, tested and run alongside you.

Why we exist.

We believe progress is a **partnership**. So we don't just deliver technology — we build it *with you*, and leave you stronger than we found you.

It's the reason Somro Global exists: not to be a vendor you manage, but a team that becomes part of yours — sharing the methods, the momentum and the outcome.

Not a vendor. A team that becomes part of yours.

Three things make working with us different — and they compound.

01 Together, not transactional.

We embed with your team, share our methods, and hand over real capability — so you grow your own strength, not a dependency.

02 The full arc.

Strategy, design, build, independent QA, integration, AI and devices — from one partner. From a sensor on a bench to a trained model in production.

03 Proven acceleration.

Battle-tested platforms and starter-kits turn years into months and risk into confidence — so your budget goes to what makes you different.

4

Delivery hubs, four continents

30+

Specialists, one team

32+

Years building & running

6

Industries, known inside

Eight capabilities. One team.

Use one of them, or the whole arc — strategy to silicon to model.

01 PRODUCT ENGINEERING

From idea to a product people love to use.

We take products from a first sketch to a dependable, scalable platform — and stay to help them grow.

- Concept enrichment & UX design
- Platform architecture & technical design
- Web, mobile & API development
- Cloud engineering, security & support

02 QUALITY ENGINEERING

Ship with confidence. Independently proven.

Objective testing is built into how we work — so you know it's right before your customers do.

- Product quality engineering
- Platform validation
- Modernisation verification
- Managed test teams

03 ENTERPRISE INTEGRATION

Make every system speak the same language.

Connect applications, data and identities securely — so your organisation moves as one.

- Integration consulting
- Enterprise identity & federation
- API manager implementation
- Enterprise integrator delivery

04 WORKFLOW & AUTOMATION

Turn manual effort into dependable flow.

Map it, automate it, improve it — so work becomes predictable, efficient and measurable.

- Process analysis & modelling
- Business process automation
- Process optimisation

05 SALESFORCE

Salesforce, shaped around how you actually sell.

From first strategy to ongoing support — implementation and customisation that fits your business.

- Consulting & advisory
- Implementation & customisation
- Integration & data management
- Support & managed services

06 AI ENABLEMENT

AI that ships — and that you can trust.

With our AI partner iFusion AI, we take you from 'where could AI help?' to governed, production AI.

- AI strategy consultation
- Custom prediction models
- Knowledge-augmented conversational AI
- Speech & data capture services

07 DEVICES & DATA

From sensor to insight.

We design the hardware, move the data, and turn it into prediction — the full path most partners can't offer.

- IoT prototyping & fabrication
- Ingestion, enrichment & analytics
- Prediction & intelligence

08 TALENT & MANAGED TEAMS

A team that becomes part of yours.

Certified professionals who extend your capability — and leadership when you need it.

- Managed teams
- CTO-as-a-Service
- R&D-as-a-Service
- Independent test teams

Let's build what's next.

Tell us where you want to go. We'll bring the team, the methods and the momentum — and stay until it's running.
